PROFESSIONAL SUMMARY

Computer Science graduate of Universitas Singaperbangsa Karawang with experience in information system development, requirements analysis, and business process digitalization through academic projects, organizations, and an industry internship. Skilled at translating user needs into digital solutions through process analysis, system design, application development with Laravel and MySQL, and system testing and validation. Strong in problem solving, analytical thinking, collaboration, and adaptability, and ready to contribute to information system development, business analysis, and organizational digital transformation.

EDUCATION

Universitas Singaperbangsa Karawang, Karawang, Indonesia **Aug 2022 to Aug 2026**
Bachelor of Computer Science (S.Kom), GPA: 3.72 / 4.00

- **Final Project (Thesis):** Design and Development of the Unsika KIP-K Student Information Center Website Using Laravel
- **Relevant Coursework:** Software Engineering, Web-Based Programming, Object-Oriented Programming, Databases.

SMK Negeri 50 Jakarta, East Jakarta, Indonesia **Aug 2019 to Jul 2022**
Multimedia, Final Score: 86.00 / 100.00

- Earned a BNSP Multimedia Competency Certificate; proficient in graphic design fundamentals, audio video production, and digital content processing.

WORK EXPERIENCE

PT Inti Ganda Perdana (Astra Otoparts Group), Jakarta, Indonesia **Feb 2026 to Aug 2026**
Knowledge Management Dept., Human Resource Div.

- Supported the Employee Competencies Development Program (ECDP) by preparing competency evaluation media and socialization materials, and managing assessment result data using Google Forms and Google Spreadsheets.
- Analyzed employee competency assessment results to identify *Competency Gaps* and drafted training recommendations (*Training Needs Analysis*).
- Processed and analyzed competency assessment data into Radar Charts to identify skill gaps against the competency requirements of each job group.

PROJECTS

KIP-K Student Information System Unsika, Undergraduate Thesis **2026**

- Analyzed the needs of KIP-K students and Campus Scholarship Management Staff to address information spreading through informal channels and administration management that was not yet centralized.
- Designed and developed an information system with Laravel and Filament using the Waterfall SDLC model, including Use Case, Activity, Sequence, and Class Diagrams, as well as an Entity Relationship Diagram (ERD) as the basis for implementation.
- Developed *multi-role* registration and authentication (User and Admin), news publishing, KHS data recording, scholarship disbursement monitoring, SK document distribution, FAQ, a complaint service, and the FORMADIKIP administration panel.
- Conducted Black Box Testing, White Box Testing based on Basis Path Testing, and User Acceptance Testing (UAT); all Black Box and White Box functionality passed, while UAT reached a 95.71% acceptance rate from 9 respondents, and the system was declared feasible for implementation at UNSIKA.

SIKARIR (UNSIKA KARIR), Capstone Project Course **2026**

- Developed a website for managing the UNSIKA student internship program, helping students find internship opportunities relevant to their study program and supporting credit conversion through institutional partnerships.
- Served as Backend Developer using Laravel to implement the application logic.
- Built an administration panel with Filament to manage company, internship vacancy, and user data dynamically.
- Performed functional testing using Black Box Testing to validate that features meet requirements and that the system runs according to the test scenarios.

Invoice Generator, Enja Laundry **2025**

- Developed a web application to automate transaction cost calculation and invoice generation, speeding up transaction administration.
- Validated calculation accuracy through Black Box Testing.

FindUp, Bangkit Academy **2024**

- Contributed to the development of a mobile application that connects developer talent, project managers, and investors to turn ideas into digital products.
- Responsible for designing the application's cloud architecture and developing an API to integrate the AI CV Scoring model with the application.
- Implemented application services on Google Cloud Platform to support deployment and application integration needs.

ORGANIZATIONAL & LEADERSHIP EXPERIENCE

HIMTIKA (Himpunan Mahasiswa Informatika Unsika), Karawang, West Java **Jan 2022 to Sep 2024**

Head of Information and Communication Division

- Led the Information and Communication Division, responsible for managing social media, publishing information, producing creative and educational content, and documenting organizational activities.
- Restructured the division into Media Creative and Media Information, drafted the annual timeline and work plan, assigned tasks and evaluated members, and applied a quality assurance checklist to standardize content publishing.
- Expanded the organization's social media reach with growth of more than 1,000 followers on the official HIMTIKA Instagram, and increased participation in organizational activities compared to the previous period.

GDSC (Google Developer Student Club) Chapter Unsika, Karawang, West Java **Dec 2023 to Aug 2024**

Events and Program Member

- Managed technical preparation, rundowns, and speaker coordination for around 10 technology workshop and bootcamp agendas.
- Collaborated with the publication team to increase participant registrations, and prepared post-event evaluation reports to improve the efficiency of future programs.

TRAINING & CERTIFICATIONS

Bangkit Academy led by Google, GoTo, Tokopedia, and Traveloka **Sep 2024 to Dec 2024**

Cloud Computing Student (MSIB Independent Study)

- Studied *Cloud Infrastructure* concepts and practices using *Google Cloud Platform* (GCP), including Compute Engine, Cloud Run, Cloud Storage, and Cloud SQL.
- Served as Cloud Engineer in the FindUp final project by designing and deploying the backend API to support application environment management.

Dicoding Indonesia **2024**

- Completed 7 competency development courses covering web and software programming, full-stack development, cloud engineering, backend, and machine learning on Google Cloud.

Dibimbing **2026**

Fullstack Web Development

- Studied web development concepts from Front-End to Backend, followed by Mock Interviews to simulate Fullstack Web Developer job interviews, writing an ATS-friendly CV, and a Portfolio Project for personal branding.
- Built a personal portfolio with React.js featuring a chatroom and an email message feature.

Singaperbangsa English Proficiency Test (SEP-T), Universitas Singaperbangsa Karawang **2025**

- Score: 440

SKILLS & ADDITIONAL INFORMATION

- **Hard Skills:** Programming, Web Development, Systems & Processes, Testing and Data, Cloud Computing, SDLC, Requirements Analysis, System Design, Process Digitalization, UML, Database Design, Black Box Testing, White Box Testing, User Acceptance Testing (UAT), Data Analysis, Data Visualization.
- **Tools:** PHP, JavaScript, Laravel, React.js, HTML, CSS, Tailwind CSS, MySQL, Google Cloud Platform (GCP), Cloud Run, Compute Engine, Cloud Storage, Cloud SQL, Git/GitHub, Google Colab, Docker, Microsoft Excel.
- **Soft Skills:** Problem Solving, Critical Thinking, Project Management, Collaboration, Adaptability, Fast Learning, Communication.
